Cathedral Master Plan Review

Since Chapter adopted the Cathedral's Master Plan in 2020, work has progressed and members of staff have changed. So halfway through its lifespan the Master Plan is being updated.

The structure of the Master Plan will remain the same, based on the Values and four Areas of Work (Worship, Mission, Hospitality, Sustainability and financing the Cathedral's activity). In recent months members of staff who are heads of department have been updating the words. The document "Master Plan draft update" shows the current section and page number, the current wording, and the suggested new wording. An example of how the Master Plan needs to be updated is the words and phrases for safeguarding.

After input from Forum, the suggested wording will go to Chapter for review and approval. After that the photos and layout will be updated. In due course there will be a new message from our new bishop and the Dean will rewrite his message.
